STAT

MEMORANDUM TO: [redacted]

SUBJECT : Transportation of Film To and From Overseas
Bases

At this morning's briefing, Mr. Bissell indicated you are to assume responsibility for arrangements to transport both unexposed and exposed film to and from overseas detachments; to the processor; and from the processor on to the ultimate customers. I feel this whole area is one in which both Operations and Security have a heavy, if not primary, interest. I think establishing responsibilities; making arrangements for transportation; establishing receipting systems for materials; and like items, cut across the board in operations, security and logistics. The Operations Division is anxious to collaborate with you in any planning or action you might take in this regard.
